

Student Password Maintenance

Hello Middle and High School Students,

Rochester Community Schools is implementing additional procedures to support network and user security. We are asking students in grades 6-12 to change their password and manage it moving forward. To change your password, please go to the [Rochester Community Schools](#) webpage, Departments tab>Technology Services>Student Resources>Password Maintenance.

You will need to have your current username and password in order to select a new password. Passwords must be a minimum of 8 characters and contain both an upper and lower case letter and a number. The longer your password is the more secure it will be. The [National Institute of Standards and Technology](#) (NIST) suggests keeping passwords simple, long, and memorable by putting together a combination of words and numbers that only you would know, e.g., Airfrogflyjump1. **To safeguard your account, do not use this password on other, non-RCS sites and never send, share, give your password to others, or write it down.**

If you need further assistance, please visit your Media Center.
